

Company Profile

Relpol S.A. is the expert manufacturer of electromagnetic relays and relay sockets.

There are four basic lines of Relpol's products:

- Plug-in power relay, used in a wide range of industrial applications.
- PCB power relays, used as power components in countless electronic devices.
- Automotive relays, for electric circuits control in cars (i.e. lamps, central locking, alarms, heating, wipers, indicators, etc.)
- Relay sockets, for simple connection of relays.

To further enhance Relpol's product offering, a number of complimentary ranges of branded equipment has been added:

- contactors and thermal relays,
- time relays,
- control relays,
- motor protection circuit breakers,
- lighting and overvoltage protection devices,
- interface relay modules,
- softstarters,
- power factor correction systems,
- push-buttons and switches.

Company Profile

The standards quality guaranteed

Taking into account the high requirements of the market and our customers' full satisfaction, Relpol S.A. constantly strives for improvement of the quality of the products and services we offer.

Our own technological, designing and research facilities remarkably help us to achieve our goals. The modern production profile and high quality of the products that comply with the requirements of the European Union are confirmed by the ISO 9001:2000 CERTIFICATE and numerous recognitions and certificates.

Product Range

■ Electromagnetic relays

■ Plug-in sockets for relays

■ Interface relays

■ Contactors and thermal overload relays

■ Time and monitoring relays

■ NEED programmable relays

■ Solid state relays

■ Switches and rotary switches
